

Application Area

Poultry feed

The safety of feed has been a topic of considerable concern for the livestock and poultry industry. The livestock and poultry feed solutions and equipment provided by HEXIE ensure the best and accurate feed production results.

Ranges:0.5-30t/h

Aquatic feed

For the past 20 years, Hexie adheres to the best feed equipment and solutions to serve aquatic feed mill. Hexie can provide complete set of 2D/3D engineering design and planning, equipment, spare parts, control systems, raw materials and formulations consultancy and staff training services.

Ranges:0.5-10t/h

Ruminant feed

Hexie has many years of ruminant feed processing technology design and equipment processing experience. During designing process, Hexie focuses on reducing residuals, cross-contamination and energy consumption. Through Hexie advanced equipment and control technology, we can achieve production automation and tracability of production processes.

Ranges:0.5-20t/h

Pre-mix feed

Based on the modular design and tailor-made according to customer's needs, it can fully meet the customers' different feed production requirements for poultry and other animals and also meet the most stringent hygiene standards, providing animals with green, clean and hygienic, safe premix feed.

Ranges:0.5-20t/h

Biomass energy

Biomass energy is to process the waste wood chips, straw and other materials into solid energy, mainly used as fertilizer, fuel and other use. And Hexie pellet mill has the features of high productivity, low energy consumption, stable operation and high quality particles.

Ranges:0.3-10t/h

Spares

Knowing the strong demand from customers for the quality and delivery time of spare parts, Hexie continuously develops the material system to prolong the service life of spare parts. Hexie makes concerted efforts to make peacekeeping machinery downtime significantly reduced and reduce production costs to a minimum.

Service

Except providing high quality products, Hexie also offers high quality systematic service. Our service includes consulting, installation & commissioning, spare service, plant designing and staff training.

Product Range

Grinding equipment.....		Dust collecting equipment.....	
Mixing equipment.....		Bagging equipment.....	
Pelleting equipment.....		Control system.....	
Extruding equipment.....		Pre-mix feed line.....	
Cooling equipment.....		Poultry feed line.....	
Crumbling equipment...		Ruminant feed line.....	
Sieving equipment.....		Aquatic feed line.....	
Conveying equipment....		Biomass pellet feed line.....	
Cleaning equipment.....		Product spares.....
